Professional Summary

Frontend Developer with 5 years of experience designing and developing scalable web and mobile applications using React.js, Redux, JavaScript, HTML5, CSS3, and React Native. Proven experience building enterprise dashboards, business intelligence platforms, warehouse management systems, and infrastructure monitoring applications. Skilled in REST API integration, CI/CD pipelines, Agile Scrum methodologies, reusable component architecture, and performance optimization. Exposure to Node.js, MongoDB, AWS, and full-stack development.

Technical Skills

Frontend: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, AJAX, JSON, TypeScript

UI Libraries: React Bootstrap, Material UI, Ant Design, Tailwind CSS, Prism UI

Backend & APIs: Node.js, MongoDB, REST APIs, Web Services

Mobile Development: React Native, Ionic React

Cloud & DevOps: AWS, Jenkins, CI/CD, Gerrit

Tools: Git, Postman, Firebase, WebSockets, NPM, Jest

Methodologies: Agile Scrum, SDLC, Design Patterns, Responsive Design, Performance Optimization

Professional Experience

CIEL HR (Nutanix) | UI Developer | Apr 2025 – Present

Nutanix Infrastructure Monitoring & Alert Management

- Engineered scalable React/Redux dashboards to monitor infrastructure health for Nutanix, improving operational visibility and reducing alert response times.
- Architected seamless integrations with Prism Central and Prism Element APIs to deliver real-time system performance tracking and proactive alert management.
- Designed a library of reusable UI components and advanced filtering systems, increasing development efficiency and streamlining the user workflow for managing complex data.
- Optimized application performance and collaborated across cross-functional teams in an Agile environment to ensure high-quality software delivery and system reliability.

Technologies: React.js, Redux, Prism UI, REST APIs, Jenkins, Gerrit, Jest

Analogyx BI | React JS Developer | May 2023 – Apr 2025

Analogyx BI (Business Intelligence Platform)

- Led the development of an enterprise-grade BI platform supporting 50+ visualization types, enabling data-driven decision-making for business users.
- Improved platform scalability and user experience by implementing optimized rendering logic and modular component architecture.
- Enhanced real-time data synchronization by integrating WebSockets and RESTful APIs, ensuring seamless updates across complex dashboards.

Technologies: React.js, Redux, React Bootstrap, WebSockets

Woodland App (Warehouse Management System)

- Spearheaded the development of inventory and logistics features within a Warehouse Management System, resulting in improved operational accuracy and workflow automation.
- Built high-performance, responsive React Native screens for mobile warehouse operations, increasing employee productivity in on-site logistics.

Technologies: *React Native, Redux*

Web Idea Solution LLP | Application Developer | Aug 2022 – Feb 2023

Osool

- Developed and launched key mobile features using React Native for a matchmaking platform, focusing on high-quality UI and user engagement.

Technologies: *React Native, Redux*

College ERP

- Delivered a comprehensive ERP solution by building critical modules for academic and administrative management, centralizing data for staff and students.
- Integrated robust REST APIs using a Node.js and MongoDB backend to support scalable data management and secure application workflows.

Technologies: *React.js, Redux, Node.js, MongoDB*

Precise Consultancy Services | Junior Front-End Developer | May 2021 – Aug 2022

RealSmart Agent

- Developed React-based real estate workflow modules, enhancing the efficiency of property management and lead tracking for agents.

Technologies: *React.js, Redux, React Bootstrap*

RealSmart Franchise Manager

- Created intuitive franchise management dashboards that streamlined business operations and performance reporting for regional managers.

Technologies: *React.js, Redux, React Bootstrap*

Digital Menu

- Developed an accessible digital menu food management tool using Ionic React and Firebase, featuring drag-and-drop functionality for dynamic content updates.

Technologies: *Ionic React, TypeScript, Firebase, React DnD*

Education

Bachelor of Biomedical Engineering

- Dhanalakshmi Srinivasan Institute of Technology - Anna University

Certifications

- Frontend / Backend Web Development Certification
- GUVI (IIT Madras Incubated) – Master Python and Building an AI Face Recognition Application
